13	2	3	15

1	14	14	4
11	7	6	9
8	10	10	5
13	2	3	15

As you can see there are, in fact, 42 unique combinations that make 33. Perhaps Gaudi read “The Hitch-hiker’s Guide to the Galaxy” where 42 is “the answer to life, the universe and everything!”.

However, if, for example, you allowed

1	14	14	4
11	7	6	9
8	10	10	5
13	2	3	15

to be different from

1	14	14	4
11	7	6	9
8	10	10	5
13	2	3	15

There are many more possible solutions (given 2 tens and 2 fourteens).
